PROFILE

Full Stack Developer with 4+ years of experience building **custom software, web applications, and complete systems**, along with the infrastructure behind them: hosting, DNS, corporate email, APIs, and chatbots. I designed and built the **CM3D** platform, in production: a REST API (Node.js and MariaDB), a desktop launcher and staff panel, and a React website.

EXPERIENCE

Full Stack Developer — Neuradev Software — Dec 2024 – Present

- Design and development of the CM3D platform, in production: REST API (Node.js and MariaDB), desktop launcher and panel, and website (React).
- Web application development with API, chatbot, and third-party tool integration.
- Domain, DNS, and corporate email management; server and hosting administration with cPanel and WHM.

Freelance Full Stack Developer — Xtrategic Publicidad Digital — Jan 2025 – Jun 2026

- Implementation of APIs, chatbots, and external tools for a digital advertising agency.
- Technical SEO and performance optimization; end-to-end support from development to production release.

Technical Support Specialist — LatinoAmérica Hosting — Aug 2022 – Apr 2024

- Administration of hosting, domains, DNS, SSL, and corporate email with cPanel and WHM.
- Support for WordPress, Joomla, PrestaShop, PHP, and MySQL; incident troubleshooting, documentation, and user training.

SELECTED PROJECTS

- **CM3D Backend.** Production REST API (Node.js, Express, MariaDB, JWT, Google OAuth, Zod): layered architecture, 43 versioned migrations, and over 80 automated tests.
- **CM3D Launcher & Admin.** Production desktop apps (Python, PyWebView): a user launcher with over 100 automated tests and a Windows service that protects downloaded files; a staff panel that updates itself from GitHub Releases.
- **Colombia Mods 3D.** Official website (React, Vite, Tailwind, Three.js) with a catalog loaded live from the API, countdown discounts, per-page SEO, and its own SMTP service. colombiamods3d.com
- **Otto.** Custom corporate e-commerce (React, Vite, Node.js, PayU, AWS). ottoapis.com
- **StockFlow (in development).** SaaS inventory system (Angular, TypeScript, Node.js, MySQL, JWT) with transactional stock movements using row locking, kardex and valuation reports, and unit and integration tests.

EDUCATION & CERTIFICATIONS

Software Development Technician — CESDE, Centro de Estudios Especializados — Feb 2022 – Feb 2024
Scrum Foundation Professional Certificate (SFPC) — CertiProf — May 2023
Universidad Desarrollo Web — FrontEnd Web Developer (30.5 h) — Udemy — Oct 2025
Master Angular: TypeScript, Firebase, Firestore, and JWT — Udemy — In progress
